www.Betterbee.com/pricelist

Thank you for trusting Betterbee to supply you with great beekeeping equipment. Over the course of a year, our catalog information becomes outdated, which is why we chose to not include pricing. Our website always offers the newest products, item updates, and current pricing. Rest assured that we are offering the best pricing possible as we navigate these economic headwinds. Betterbee is actively working with our manufacturers and vendor partners, as well as monitoring the effects of tariffs both as they have increased, and hopefully are reduced in the future. We have created this price sheet that will be updated regularly. It can be downloaded at [www.betterbee.com/pricelist](http://www.betterbee.com/pricelist) Please bear with us as we work to make this price list as easy-to-use as possible and let us know if you have any suggestions.

\*Prices current as of date on bottom of page and are subject to change.

Notes on reading these pages:

Within each product's section, the item code and name is at the top. The number on the left side is the catalog page number. The pricing may show quantity breaks if they exist. The quantities are above the price for each individual item in that quantity band. If the item is a kit, different options may affect the price, so we recommend calling to get more information on available options and their impacts on price.
